**Abstract:** This research evolves in to the great issues caused by the covid-19 pandemic & economic crisis on the construction industry in Sri Lanka. Sri Lanka was faced with two major crises as the COVID 19 pandemic, and a severe economic crisis starting in early 2022. This research intends to investigate the challenges faced by local quantity surveyors and identify effective approaches for them to succeed in this demanding environment. The research employs a method approach, quantitative data collection method. Surveys will be conducted among practicing quantity surveys in Sri Lanka to gain insights into their experiences and perspectives. The data will be analyzed using quantity research techniques to provide a comprehensive understanding of the issue at hand. In this research, it has been focused to find out the best possible ways to face these kinds of crises as a successful local quantity surveyor and mitigate the effects of it as much as possible.
